

FP8 Fairfax

Optional side piece return end mouldings (45x20cm)

ACCESSORIES

The FP1, FP2, FP4, FP5 and FP7 fireplaces can be installed with optional side piece return end mouldings around an existing chimney (as shown above), or simply fixed as supplied flat against the wall surface.

Quotations can also be supplied for marble hearths and backslabs.

INSTALLATION

Stevensons' fireplaces are manufactured with timber lath reinforcement in all edges.

This enables the fireplace to be strongly screw fixed into place, as well as by bonding with adhesive.

FINISHING

Screw fixing holes can be invisibly filled after installation. Any suitable heat tolerant water or oil based paint can be used to decorate the fireplace.

The fine smooth plaster finish needs no sanding before paint application, but ensure surfaces are dust free.

GENERAL

Stevensons' fireplaces will be delivered as a single unit (except for side piece return end mouldings). The delivery and payment conditions of Stevensons of Norwich Ltd are applicable.

Drawings, text and prices are subject to alteration without prior notice.
